

SD-110 SGCC CERTIFICATION FEES

(Per 6 month certification period)

COMPOSITE PROGRAM

1st certified product at a plant	\$ 630.00
Each subsequent product	88.00

COMPOSITE PROGRAM + CAN/CGSB (Canadian Standard)

1st certified product at a plant	\$ 676.00
Each subsequent product	96.00

Please note, these fees are paid twice per year. Invoices are sent out in April for the July - December cycle and sent out in October for the January - June cycle. Certification is good until the end of the cycle, January 1-June 30 and July 1-December 31. If a client comes in the middle of a certification cycle (After April 1 or after October 1) They are prorated 50% of the current cycle PLUS full rate of the next cycle as billing has already been issued.

There is also a 2x per year "Foreign Inspection Fee" of \$700 billed every certification cycle each year, for any non-US/non-Canadian company to cover traveling fees for our inspector to visit your facility.

Testing Fees are based on the product type and designated laboratory. Contact the approved laboratory of your choice for Prototype testing fees, and SGCC for on going certification testing fees thereafter.

Example of costs to certify products to COMPOSITE (ANSI + CPSC) Standards

New US Plant getting into program:

\$630 first product, \$88 each additional product (These costs are 2x per year)

New NON-US Plant getting into program:

\$630 first product, \$88 each additional product (These costs are 2x per year) **PLUS**

\$700 annual foreign inspection fee (2x per year)

Existing SGCC Plant adding a new product - \$88 Composite or \$96 Composite+CAN/CGSB (2x per year)

Please note that these are only the certification fees: Testing fees are in addition to these fees

RETEST FEES

Should one of your products fail to comply with regular testing, a RETEST must be completed and therefore, retest fees (both administrative and testing) are assessed. Retesting fees are as follows:

Admin Fee	\$50.00 for each thickness that is non-compliant
Testing Fee	(Depends on the product and lab used) same test fee as the client normally pays

Failing to meet labeling requirements is also considered a failed test, therefore, a retest must be conducted.
